## EXECUTIVE SUMMARY

The Jessamine County Health Department (JCHD) contracted with researchers at Asbury University to conduct a public opinion survey of Jessamine County residents on the topic of tobacco usage in indoor public places. The content and methodology of this survey was similar to previous research conducted by the University of Kentucky for JCHD in 2006.

In November 2013, 690 Jessamine County residents completed the survey by landline phone. The entirety of these responses forms the overall sample. A subset of these responses, selected to match 2012 census data of Jessamine County, form the sculpted sample. In addition, 80 members of the Jessamine County Chamber of Commerce completed a shorter survey online.

What follows are tabular and graphical data describing the frequencies and statistical analyses performed on all received data of these three samples. Description of the methodology used for the public opinion survey and for local Chamber of Commerce survey can be found in the Appendix.

## RESULTS FROM CHAMBER OF COMMERCE SAMPLE ( $n=80$ )

- Results from the Chamber of Commerce sample show that approximately 90 percent of the responding Chamber of Commerce members do not permit smoking inside of their businesses.
- Between 72 and 77 percent favor ordinances against smoking indoors in public places, but only between 62 and 66 percent favor laws to this effect.
- Approximately 47 percent believed such smoking restrictions would have no effect on new businesses coming to Jessamine County; whereas, about 31 percent believed such restrictions would attract new businesses.

## RESULTS FROM OVERALL SAMPLE ( $n=690$ )

- Results from the overall sample should be considered with caution given that females and persons over 45 were greatly overrepresented.
- In general, the overwhelming majority of the sample indicated support for policies prohibiting indoor public smoking either through complete or partial (i.e., designated smoking areas) restrictions.
- Opinions were more mixed when describing potential restrictions for bars and taverns, where people tended to be more lenient.
- Interestingly, most people claimed that they were not smokers, that most of their work places had smoking restrictions, and that they were exposed to very little secondhand smoke at work, if any.
- In comparing the attitudes and opinions between men and women, no significant differences were found in their perspectives on smoking restrictions. However, women were much more likely than men to express support for county, city, and state laws prohibiting indoor smoking.
- Contrary to expectations, there were no differences in attitudes and opinions between Democrats and Republicans. Democrats and Republicans appeared to equally endorse smoking restrictions and policies.
- There were significant differences in attitudes and opinions among current smokers and nonsmokers. A consistent pattern found in the data suggests current smokers (more so than people in general) are opposed to total bans and in support of having areas set aside for smoking. Conversely, non-smokers (more so than people in general) are supportive of total bans but not supportive of having areas set aside for smoking. This disparity between current smokers and people in general regarding opposition of total bans is twice as large as the disparity between non-smokers and people in general regarding support of total bans. Similarly, the disparity between current smokers and people in general supporting setting areas aside for smokers is twice as large as the disparity between non-smokers and people in general opposing areas being set aside for smokers. With regard to bars and taverns, smokers more so than people in general want no restrictions, and non-smokers more so than people in general do want restrictions. Given the size of the effect between smokers, non-smokers, and people in general, it is very important to know the current base rate of smokers in Jessamine County. They are more likely opposed to restrictions than nonsmokers are likely in favor of restrictions. These same basic patterns describe the responses regarding city, county, and state laws. Therefore, to the degree that Jessamine County has more current smokers than the 11.7 percent found in this survey, residents may not be as supportive of restrictions as these results suggest.

## RESULTS FROM SCULPTED SAMPLE $(n=128)$

- Results from the sculpted sample should be more representative of Jessamine County residents in general as it more accurately mirrors Jessamine County in terms of gender and age.
- In general, a majority of the sculpted sample, though less of a majority than found within the full sample, indicated support for policies prohibiting indoor public smoking either through complete or partial (i.e., designated smoking areas) restrictions.
- Opinions were more mixed when describing potential restrictions for bars and taverns, where people tended to be favor fewer restrictions.
- Also, as found in the full sample, most people claimed that they were not smokers, that most of their work places had smoking restrictions, and that they were exposed to very little secondhand smoke at work, if any.
- Similar to the full sample, there were no differences in attitudes and opinions between Democrats and Republicans. Democrats and Republicans appeared to equally endorse smoking restrictions and policies.
- However, unlike found in the full sample, in this more representative, sculpted sample, no significant differences were found between men's and women's perspectives on smoking restrictions or between their support for laws prohibiting indoor smoking.
- Overall, participants in this sculpted sample showed support for policies and laws restricting indoor public smoking, but to a lesser extent than found in the full sample. This implies that older persons and females, who were overrepresented in the full sample, likely are more supportive of anti-smoking legislation than are men and younger persons, who are more fairly represented in the sculpted sample.

COMPARISION TO 2006 SURVEY

- Current results suggest a movement towards greater endorsement of smoking restrictions in public places. Most questions showed about a 10 percent gain in favor of restrictions across both types of businesses and political jurisdictions.
- However, about 15 percent fewer viewed the creation of smoking restrictions as a positive tool to attract new businesses.

## THE CHAMBER OF COMMERCE SAMPLE ( $n=80$ )

## GENERAL INFORMATION ABOUT THE SAMPLE

A. Residence. The majority reported having a physical business location in Nicholasville (82.5\%). Another 28 business leaders started this survey but did not have a physical business location in Jessamine County and therefore did not finish the survey.

| Location | $n$ | Percent |
| :--- | ---: | ---: |
| Nicholasville | 66 | 82.5 |
| Wilmore | 6 | 7.5 |
| Other Places in County | 8 | 10.0 |
| Total | 80 | 100.0 |

B. Types of Businesses.

| Type of Business | n | Percent |
| :--- | :---: | ---: |
| Accommodation (Hospitality) | 1 | 1.3 |
| Administrative and Support | 2 | 2.5 |
| Agricultural, Forestry, Fishing \& Hunting | 2 | 2.5 |
| Arts, Entertainment, and Recreation | 3 | 3.8 |
| Construction | 4 | 5.0 |
| Finance and Insurance | 7 | 8.8 |
| Food Services (Restaurant/Bars) | 5 | 6.3 |
| Healthcare | 11 | 13.8 |
| Information | 1 | 1.3 |
| Management \& Enterprise | 1 | 1.3 |
| Manufacturing | 6 | 7.5 |
| Other Services | 16 | 20.0 |
| Professional, Scientific and Technical Services | 8 | 10.0 |
| Public Administration | 1 | 1.3 |
| Real Estate and Rental/Leasing | 1 | 1.3 |
| Retail Trade | 8 | 10.0 |
| Utilities | 1 | 1.3 |
| Wholesale Trade | 1 | 1.3 |
| No Response | 1 | 1.3 |
| Total | 100.0 |  |

C. Open to Public. The majority of the businesses are open to the public (86.3\%).

| Open to Public? | $n$ | Percent |
| :--- | ---: | ---: |
| Yes | 69 | 86.3 |
| No | 9 | 11.3 |
| No Response | 2 | 2.5 |
| Total | 80 | 100.0 |

D. Number of Employees. The majority of businesses (63.8\%) have between 1 and 9 employees. The median number of employees was 5 ; the mean number of employees was 20.31 ( $S D=59.70$ ).

| Number of Employees | $n$ | Percent |
| :--- | ---: | ---: |
| $1-9$ | 51 | 63.8 |
| $10-19$ | 16 | 20.0 |
| $20-29$ | 1 | 1.3 |
| $30-39$ | 4 | 5.0 |
| $40-49$ | 1 | 1.3 |
| $50-99$ | 4 | 5.2 |
| $100-199$ | 2 | 2.6 |
| $200-299$ | 0 | 0.0 |
| $300-399$ | 0 | 0.0 |
| $400-499$ | 0 | 0.0 |
| $500-599$ | 1 | 1.3 |
| Total | 80 | 100.0 |

## OPINIONS ABOUT INDOOR SMOKING POLICIES

A. Smoking Inside Business. "Do you allow smoking inside your business?"

B. State-Level Smoke-Free Bill. "A state-level smoke-free bill has been filled in previous legislative sessions that would have prohibited smoking inside public buildings and workplaces, including restaurants, bars, and hotels. To what extent do you favor or oppose a statewide ordinance?"

C. Local Ordinance. "To what extent do you favor or oppose a local (i.e., city-wide or county-wide) ordinance?"

|  | $n$ | Percent |
| :--- | ---: | ---: |
| Strongly Favor | 47 | 58.8 |
| Somewhat Favor | 15 | 18.8 |
| Somewhat Oppose | 8 | 10.0 |
| Strongly Oppose | 10 | 12.5 |
| Total | 80 | 100.0 |

## THE FULL SAMPLE ( $n=690$ )

GENERAL INFORMATION ABOUT THE SAMPLE
A. Residence. The majority reported living in Nicholasville (69.9\%) and then Wilmore (22.0\%). Note that an additional 21 people completed the survey even though they denied living in Jessamine County; they were removed from this sample.

| Location | $n$ | Percent |
| :--- | ---: | ---: |
| Nicholasville | 482 | 69.9 |
| Wilmore | 152 | 22.0 |
| Other Places in County | 56 | 8.1 |
| Total | 690 | 100.0 |

B. Gender. The majority of the sample was female (69.7\%).

| Gender | $n$ | Percent |
| :--- | ---: | ---: |
| Female | 481 | 69.7 |
| Male | 209 | 30.3 |
| Total | 690 | 100.0 |

C. Age. The average age of participants was $59.62(S D=14.95)$.

| Age Range | $n$ | Percent |
| :--- | ---: | ---: |
| $18-29$ | 17 | 2.2 |
| $30-39$ | 58 | 8.3 |
| $40-49$ | 103 | 14.9 |
| $50-59$ | 140 | 20.4 |
| $60-69$ | 187 | 27.1 |
| $70-79$ | 117 | 16.9 |
| $80-89$ | 54 | 7.9 |
| $90-99$ | 8 | 1.1 |
| No Response | 6 | 0.9 |
| Total | 690 | 100.0 |

D. Political Affiliation. More of the sample reported affiliating with the Republican Party (39.9\%), with affiliation to the Democratic Party being reported almost as often (31.3\%).

| Political Affiliation | $n$ | Percent |
| :--- | ---: | ---: |
| Democrat | 216 | 31.3 |
| Republican | 275 | 39.9 |
| Varies Democrat / Republican | 20 | 2.9 |
| Conservative | 10 | 1.4 |
| Independent | 72 | 10.4 |
| Libertarian | 2 | 0.3 |
| None | 41 | 5.9 |
| No Response | 54 | 7.7 |
| Total | 690 | 100.0 |

E. Educational Level. Educational levels were varied, with the majority having a high school diploma or further education (91.6\%). The average educational level was 14.11 ( $S D=2.79$ ), which is the equivalent of a couple of years of college / training beyond high school.

| Educational Level | Years | $n$ | Percent |
| :--- | :--- | ---: | ---: |
| No School | 0 | 1 | .1 |
| Elementary School | 5 | 1 | .1 |
|  | 6 | 1 | .1 |
| Middle School | 7 | 7 | 1.0 |
|  | 8 | 11 | 1.6 |
|  | 9 | 5 | .7 |
| High School | 10 | 16 | 2.3 |
|  | 11 | 17 | 2.5 |
| Associate's Degree / Trade School | 14 | 119 | 17.2 |
|  | 15 | 25 | 3.6 |
| Bachelor's Degree | 15 | 8 | 1.2 |
|  | 16 | 143 | 20.7 |
| Master's Degree | 17 | 17 | 2.5 |
| Doctoral Degree | 18 | 80 | 11.6 |
| No Answer | 19 | 5 | .7 |
|  | 20 | 20 | 2.9 |
|  |  | 3 | .4 |

F. Racial / Ethnic Background. The majority of the sample reported being white (92.8\%).

| Racial / Ethnic Background | $n$ | Percent |
| :--- | ---: | ---: |
| White | 640 | 92.8 |
| Black or African American | 12 | 1.7 |
| American / Mixed | 8 | 1.9 |
| American Indian or Alaska Native | 8 | 1.2 |
| Asian | 4 | 0.6 |
| Hispanic or Latino | 4 | 0.6 |
| Arab American | 1 | 0.1 |
| No Answer | 8 | 1.2 |
| Total | 690 | 100.0 |

G. Number of Persons in Household. The average reported number of persons in households was 2.55 ( $S D=1.41$ ).

| Number of Persons in <br> Household | $n$ | Percent |
| :--- | ---: | ---: |
| No Response | 3 | 0.4 |
| 1 person | 131 | 19.0 |
| 2 persons | 308 | 44.6 |
| 3 persons | 103 | 14.9 |
| 4 persons | 82 | 11.9 |
| 5 persons | 29 | 4.2 |
| 6 persons | 23 | 3.3 |
| 7 persons | 4 | 0.6 |
| 8 persons | 5 | 0.7 |
| 9 persons | 2 | 0.3 |
| Total | 690 | 100.0 |

H. Number of Persons in Household. The majority of the sample (63.7\%) reported earning more income than $185 \%$ of the federal poverty level for their reported household size.

| Income Levels across all Household Sizes | $n$ | Percent |
| :--- | ---: | ---: |
| Less than Poverty Level | 77 | 11.1 |
| Poverty Level to 185\% of Poverty Level | 119 | 17.2 |
| More than 185\% of Poverty Level | 441 | 63.7 |
| Declines to answer question (use this sparingly) | 53 | 7.7 |
| Total | 690 | 100.0 |

For each of the following household sizes, participants indicated whether they earned less than poverty level, between poverty level to $185 \%$ of poverty, or more than $185 \%$ of the poverty level for their household size.

| Income with 1 Person in Household | $n$ | Percent |
| :--- | ---: | ---: |
| Less than $\$ 11,490$ ? | 21 | 3 |
| Between $\$ 11,490$ and $\$ 21,257 ?$ | 38 | 5.5 |
| More than $\$ 21,257 ?$ | 64 | 9.3 |

| Restrictions for Work Places <br>  <br> factories) | Ban smoking entirely | 413 | 59.9 |
|  | Have no smoking restrictions | 19 | 2.8 |
|  | Set aside certain areas for smoking | 258 | 37.4 |
|  | Total | 690 | 100.0 |

B. Attitudes about Exposure to Secondhand Smoke. "Please tell me to what degree you agree or disagree with the following statements:"

1. "Secondhand smoke is associated with health conditions."

2. "All public places should have a non-smoking area."

|  | $n$ | Percent |
| :--- | ---: | ---: |
| Strongly Agree | 502 | 72.8 |
| Somewhat Agree | 87 | 12.6 |
| Somewhat Disagree | 38 | 5.5 |
| Strongly Disagree | 62 | 9.0 |
| No Response | 1 | .1 |
| Total | 690 | 100.0 |

3. "People who work in bars and restaurants should be free from exposure to secondhand smoke, even if this means smoking is not allowed at all in bars and restaurants."

|  | $n$ | Percent |
| :--- | ---: | ---: |
| Strongly Agree | 402 | 58.3 |
| Somewhat Agree | 139 | 20.1 |
| Somewhat Disagree | 95 | 13.8 |
| Strongly Disagree | 49 | 7.1 |
| No Response | 5 | .7 |
| Total | 690 | 100.0 |

4. "People who go to bars and restaurants should be able to smoke there, even if this means people who work there will be exposed to secondhand smoke."

|  | $n$ | Percent |
| :--- | ---: | ---: |
| Strongly Agree | 77 | 11.2 |
| Somewhat Agree | 117 | 17.0 |
| Somewhat Disagree | 114 | 16.5 |
| Strongly Disagree | 377 | 54.6 |
| No Response | 5 | .7 |
| Total | 690 | 100.0 |

5. "In regard to secondhand smoke in eating establishments, should:" (*This item was added later in the data collection process.)

|  | $n$ | Percent |
| :--- | ---: | ---: |
| Bars and restaurants have the same <br> smoking policies. | 264 | 60.1 |
| Bars have more relaxed smoking <br> policies than restaurants. | 165 | 38.1 |
| Restaurants have more relaxed <br> smoking policies than bars. | 4 | .9 |
| Total | ${ }^{4} 433$ | 100.0 |

6. "In order to get a better sense of how important a smoking policy is to you as you decide where to dine; please tell me how much more likely would you visit a restaurant if you knew a restaurant was smoke-free?"

|  | $n$ | Percent |
| :--- | ---: | ---: |
| Very Likely | 482 | 69.9 |
| Somewhat Likely | 48 | 7.0 |
| It would make no | 122 | 17.7 |
| difference to me. |  | 4.8 |
| Not Likely At All | 33 | .7 |
| No response | 5 | 100.0 |
| Total | 690 |  |

## EXPOSURE TO SECONDHAND SMOKE IN THE WORKPLACE

A. Do you work in Jessamine County?

|  |  | Restriction | $n$ |
| :--- | :--- | ---: | ---: |
| "Are you currently working full-time or part- <br> time outside the home?" | Yes | 286 | 41.4 |
|  | No | 403 | 58.4 |
|  | No response | 1 | .1 |
|  | Total | 690 | 100.0 |
| "If 'yes,' do you work in Jessamine County?" | No | Restriction | $n$ |
|  | Pes | 156 | 22.6 |
|  | No response | 154 | 22.3 |
|  | Total | 380 | 55.1 |

B. "Which of the following best describes the official indoor smoking policy for your place of work?"

| Policy Reported | $n$ | Percent |
| :--- | ---: | ---: |
| I don't know | 2 | 0.1 |
| No indoor work areas | 10 | 6.6 |
| No official policy | 11 | 7.2 |
| No smoking allowed in <br> any work areas <br> Smoking allowed in all <br> work areas <br> Smoking allowed in <br> some work areas | 105 | 69.1 |
| Total | 16 | 10.5 |

C. "Thinking about the past 7 days altogether, about how many hours were you exposed to OTHER people's tobacco smoke at work?"

## PERSONAL SMOKING BEHAVIORS

A. Smoker? "In the next set of questions, we will ask about your own smoking behavior. Are you a:"

|  | $n$ | Percent |
| :--- | ---: | ---: |
| No Response | 2 | .3 |
| Current smoker | 73 | 10.6 |
| Former smoker | 172 | 24.9 |
| Non-smoker | 443 | 64.2 |
| Total | 690 | 100.0 |

B. Smoking Plans. "Do you intend to continue smoking?" (For current smokers only):

|  | $n$ | Percent |
| :--- | ---: | ---: |
| Maybe | 13 | 17.3 |

## THE SCULPTED SAMPLE $(n=128)$

Participants were randomly deleted from the sample to create this sculpted sample, which is more representative of Jessamine County residents in terms of gender and median age.

GENERAL INFORMATION ABOUT THE SAMPLE
A. Residence. The majority reported living in Nicholasville (70.3\%) and then Wilmore (22.7\%).

| Location | $n$ | Percent |
| :--- | ---: | ---: |
| Nicholasville | 90 | 70.3 |
| Wilmore | 29 | 22.7 |
| Other Places in County | 9 | 7.0 |
| Total | 128 | 100.0 |

B. Gender. The sample reflects the 2012 census gender distribution ( $51 \%$ female and $49 \%$ male).

| Gender | $n$ | Percent |
| :--- | ---: | ---: |
| Female | 65 | 50.8 |
| Male | 63 | 49.2 |
| Total | 128 | 100.0 |

C. Age. The average age of participants was 47.76 ( $S D=14.53$ ).

| Age Range | $n$ | Percent |
| :--- | ---: | ---: |
| $20-29$ | 7 | $5 \cdot 5$ |
| $30-39$ | 34 | 26.6 |
| $40-49$ | 37 | 28.9 |
| $50-59$ | 18 | 14.1 |
| $60-69$ | 17 | 13.3 |
| $70-79$ | 7 | 5.5 |
| $80-89$ | 4 | 3.1 |
| $90-99$ | 0 | 0 |
| No Response | 4 | 3.1 |
| Total | 128 | 100.0 |

D. Political Affiliation. More of the sample reported affiliating with the Republican Party ( $40.6 \%$ ), with affiliation to the Democratic Party being reported somewhat less frequently (27.3\%).

| Political Affiliation | $n$ | Percent |
| :--- | ---: | ---: |
| Democrat | 35 | 27.3 |
| Republican | 52 | 40.6 |
| Varies Democrat / Republican | 1 | 0.8 |
| Conservative | 3 | 2.3 |
| Independent | 12 | 9.4 |
| Libertarian | 0 | 0 |
| None | 13 | 10.2 |
| No Response | 12 | 9.4 |
| Total | 128 | 100.0 |

E. Educational Level. Educational levels were varied, with virtually all having a high school diploma or further education (96.0\%). The average educational level was $14.55(S D=2.91)$, which is the equivalent of a couple of years of college / training beyond high school.

| Educational Level | Years | $n$ | Percent |
| :--- | :--- | ---: | ---: |
| No School | 0 | 1 | .8 |
| Elementary School | 5 | 0 | 0 |
|  | 6 | 0 | 0 |
| Middle School | 7 | 0 | 0 |
|  | 8 | 2 | 1.6 |
|  | 9 | 0 | 0 |
|  | 10 | 0 | 0 |
| High School | 11 | 2 | 1.6 |
|  | 12 | 36 | 28.1 |
| Associate's Degree / Trade School | 13 | 6 | 4.7 |
|  | 15 | 22 | 17.2 |
| Bachelor's Degree | 2 | 1.6 |  |
|  | 17 | 31 | 24.2 |
| Master's Degree | 17 | 2 | 1.6 |
|  | 18 | 16 | 12.5 |
| Doctoral Degree | 19 | 1 | .8 |
| No Answer | 20 | 7 | 5.5 |
|  |  | 0 | 0 |

F. Racial / Ethnic Background. The majority of the sample reported being white (88.3\%).

| Racial / Ethnic |
| :--- | ---: | ---: |
| Background |$\quad n$|  | Percent |  |
| ---: | ---: | ---: |
| White | 113 | 88.3 |
| Black or African American | 1 | 0.8 |
| American / Mixed | 5 | 3.9 |
| American Indian or Alaska | 2 | 1.6 |
| Native | 2 | 1.6 |
| Asian | 1 | 0.8 |
| Hispanic or Latino | 0 | 0 |
| Arab American | 4 | 3.1 |
| No Answer | 128 | 100.0 |
| Total |  |  |

G. Number of Persons in Household. The average reported number of persons in households was 3.31 ( $S D=1.59$ ).

| Number of Persons in <br> Household | $n$ | Percent |
| :--- | ---: | ---: |
| No Response | 1 | 0.8 |
| 1 person | 13 | 10.2 |
| 2 persons | 37 | 28.9 |
| 3 persons | 18 | 14.1 |
| 4 persons | 34 | 26.6 |
| 5 persons | 11 | 8.6 |
| 6 persons | 11 | 8.6 |
| 7 persons | 1 | 0.8 |
| 8 persons | 2 | 1.6 |
| 9 persons | 0 | 0 |
| Total | 128 | 100.0 |

H. Number of Persons in Household. The majority of the sample (63.3\%) reported earning more income than $185 \%$ of the federal poverty level for their reported household size. (One respondent did not answer. See table above.)

| Income Levels across all Household Sizes | $n$ | Percent |
| :--- | ---: | ---: |
| Less than Poverty Level | 17 | 13.3 |
| Poverty Level to 185\% of Poverty Level | 21 | 16.4 |
| More than 185\% of Poverty Level | 81 | 63.3 |
| Declines to answer question (use this sparingly) | 9 | 7.0 |
| Total | 128 | 100.0 |

For each of the following household sizes, participants indicated whether they earned less than poverty level, between poverty level to $185 \%$ of poverty, or more than $185 \%$ of the poverty level for their household size.

| Income with 1 Person in Household | $n$ | Percent |
| :--- | ---: | ---: |
| Less than $\$ 11,490$ ? | 4 | 3.1 |
| Between $\$ 11,490$ and $\$ 21,257 ?$ | 1 | 0.8 |
| More than $\$ 21,257 ?$ | 7 | 5.5 |
| Declines to answer question (use this sparingly) | 2 | 1.6 |
| Total | 14 | 11.0 |

## APPENDIX A

The researchers at Asbury University 1) used undergraduates to gather survey information from a sample of Jessamine County residents; 2) solicited survey responses from members of the local Chamber of Commerce; 3) completed this work and have compiled this report with statistical analysis for submission to the JCHD; and 4) performed this research within the proposed budget.

## METHOD FOR CHAMBER OF COMMERCE SURVEY

The Jessamine Chamber of Commerce provided a membership contact list of 364 members, including small businesses, franchises, church organizations, health clinics, banks, educational institutions, and public officials. A link to an internet-based survey was sent to the contact person listed for 298 of these 364 members. The other 66 members either had no email listed or the email listed was not working. Asbury University researchers did attempt to contact some of these 66 members through their websites' contact forms. Of the 298 members contacted through email, 36.4 percent responded to the survey ( $n=108$ ), but 28 indicated their businesses did not have a physical location within Jessamine County, disqualifying them from the study. The final sample consisted of 80 members.

## METHOD FOR FULL SURVEY

Participants were recruited by 6 trained undergraduate psychology majors who made random landline phone calls to constituents in Jessamine County.

Landlines were chosen as the method of contact given the cost of ordering cell phone numbers and the likelihood of low productivity. There was no cost to using local phone books with landlines; whereas, the cost of ordering 11,000 cell phone numbers was around $\$ 550$. The cost would triple to purchase a much more reliable cell phone list which both verifies each number was associated with a billing zip code within Jessamine County and verifies there has been recent activity on that phone line. Even with this more expensive list, there will be a percentage of those phone numbers out of active use. Survey Sampling (Orem, Utah) predicts that with this list there would be one completed survey via cell phones for approximately every 71 calls. Survey Sampling predicted that successful response rates would double when using landlines (1 completed survey per every 35.5 calls). Therefore, while using cell phone numbers may potentially increase representativeness of younger Jessamine County residents, the lower rate of productivity would have significantly impaired the ability to gather a sufficiently sized sample within the time and budget constraints.

In the current study, calls were made over six weeks; there were 182 hours of calling. Approximately 3.9 surveys were completed per hour, with approximately 22.7 calls made per hour, which yields an overall response rate of approximately 17 percent.

Data from 711 respondents was gathered, but 21 participants had to be removed due to incomplete surveys or disqualification due to living outside of Jessamine County. Partially into the data collection, the research team identified participants' frustration in indicating their agreement with statements about "eating establishments, such as bars and restaurants," as they reported that different eating
establishment should have different restrictions. As such, an additional question was added so that they could clarify their position.

## SCULPTING SUB-SAMPLE

Using data from the 2012 census, an additional sample was sculpted out of the larger 690 respondents. It was found that the larger sample over-represented females and over-represented older constituents. Thus, female and older respondents were randomly eliminated from the sample until the median age reached around age 47 and the gender ratio was $51 \%$ female and $49 \%$ male - putting both demographic variables in much greater alignment with the census-generated data (U.S. Department of Commerce, Bureau of the Census, Annual Estimates, 2012). This process, however, served to dwindle the size of the sculpted sample down to 128 respondents.

## FREQUENCY COUNTS

Basic frequency counts and percentages have been extracted from both samples and put into tabular and graphical format below.

## INFERENTIAL TESTS

Additionally, several inferential statistics were run to determine if evidence existed for differential responses to various attitude and opinion questions in the survey. In particular, differences related to gender, political affiliation, and personal smoking behavior were investigated. The results of these analyses as well as tabular data are presented below.

Inferential tests determine if probabilistic evidence is found to reject null hypotheses - that is, hypothesis that there are no differences due to, in this case, gender or political affiliation differences. Failing to reject null hypotheses does not mean there are no differences. It simply means that if there are differences, they are not substantial enough to register as significant given the size of the sample being analyzed.

FURTHER POLITICAL ANALYSES WITH THE FULL SAMPLE ( $n=690$ ).
A. OPINIONS ABOUT INDOOR SMOKING RESTRICTIONS

1. There is no evidence of political affiliation-based differences in opinions about smoking restrictions in restaurants, $\chi^{2}(10)=6.78$, n.s.

| Political Affiliation |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Response regarding Restaurants | Democrat $(n=218)$ | Republican / Conservative $(n=285)$ | Libertarian $(n=2)$ | Independent / Either $(n=98)$ | None $(n=37)$ | No <br> Response $(n=52)$ | Overall <br> Percent (\%) of Sample |
| Ban smoking entirely | 71.3\% | 76.5\% | 100.0\% | 75.5\% | 67.6\% | 80.8\% | 74.8\% |
| Have no smoking restrictions | 3.2\% | 3.2\% | 0.0\% | 4.1\% | 5.4\% | 5.8\% | 3.6\% |
| Set aside certain areas for smoking | 25.5\% | 20.4\% | 0.0\% | 20.4\% | 27.0\% | 13.5\% | 21.7\% |
| Total | 100.0\% | 100.0\% | 100.0\% | 100.0\% | 100.0\% | 100.0\% | 100.0\% |

2. There is no evidence of political affiliation-based differences in opinions about smoking restrictions in bars and taverns, $\chi^{2}(10)=12.99$, n.s.

| Political Affiliation |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Response <br> regarding <br>  <br> Taverns | Democrat $(n=218)$ | Republican / Conservative $(n=285)$ | Libertarian $(n=2)$ | Independent / Either $(n=98)$ | None $(\mathrm{n}=37)$ | No Response ( $n=52$ ) | Overall <br> Percent (\%) of Sample |
| Ban smoking entirely | 44.9\% | 42.8\% | 100.0\% | 40.8\% | 43.2\% | 51.9\% | 44.1\% |
| Have no smoking restrictions | 20.8\% | 22.5\% | 0.0\% | 28.6\% | 35.1\% | 21.2\% | 23.3\% |
| Set aside certain areas for smoking | 34.3\% | 34.0\% | 0.0\% | 30.6\% | 21.6\% | 26.9\% | 32.3\% |
| No response | 0.0\% | 0.7\% | 0.0\% | 0.0\% | 0.0\% | 0.0\% | 0.3\% |
| Total | 100.0\% | 100.0\% | 100.0\% | 100.0\% | 100.0\% | 100.0\% | 100.0\% |

3. There is evidence of political affiliation-based differences in opinions about smoking restrictions in hotels and motels, $\chi^{2}(10)=18.45, p<.048$. Those who gave no response in terms of their political affiliation chose "ban smoking entirely" more often than expected and chose "set aside certain areas for smoking" less often than expected given the rest of the sample.

| Political Affiliation |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Response regarding Hotels \& Motels | Democrat $(n=218)$ | Republican / Conservative $(n=285)$ | Libertarian $(n=2)$ | Independent / Either $(n=98)$ | None $(n=37)$ | No Response $(n=52)$ | Overall <br> Percent (\%) of Sample |
| Ban smoking entirely | 48.6\% | 55.1\% | 100.0\% | 43.9\% | 54.1\% | 71.2\% | 52.8\% |
| Have no smoking restrictions | 4.2\% | 4.2\% | 0.0\% | 6.1\% | 8.1\% | 7.7\% | 4.9\% |
| Set aside certain areas for smoking | 47.2\% | 40.7\% | 0.0\% | 50.0\% | 37.8\% | 21.2\% | 42.3\% |
| Total | 100.0\% | 100.0\% | 100.0\% | 100.0\% | 100.0\% | 100.0\% | 100.0\% |

4. There is no evidence of political affiliation-based differences in opinions about smoking restrictions in work places such as stores, businesses, and factories, $\chi^{2}(10)=10.30$, n.s.

| Political Affiliation |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Response regarding Work Places | Democrat $(n=218)$ | Republican / Conservative $(n=285)$ | Libertarian $(n=2)$ | Independent / Either $(n=98)$ | None $(\mathrm{n}=37)$ | No <br> Response $(n=52)$ | Overall <br> Percent (\%) of Sample |
| Ban smoking entirely | 55.6\% | 62.8\% | 100.0\% | 54.1\% | 59.5\% | 71.2\% | 59.9\% |
| Have no smoking restrictions | 2.3\% | 2.5\% | 0.0\% | 3.1\% | 5.4\% | 3.8\% | 2.8\% |
| Set aside certain areas for smoking | 42.1\% | 34.7\% | 0.0\% | 42.9\% | 35.1\% | 25.0\% | 37.4\% |
| Total | 100.0\% | 100.0\% | 100.0\% | 100.0\% | 100.0\% | 100.0\% | 100.0\% |

## B. OPINIONS ABOUT INDOOR SMOKING POLICIES

1. There is no evidence of political affiliation-based differences in opinions about a county-wide law forbidding smoking in all public buildings, $\chi^{2}(10)=8.19$, n.s.

| Political Affiliation |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| County-Wide Policy? | Democrat $(n=218)$ | Republican / Conservative $(n=285)$ | Libertarian $(n=2)$ | Independent / Either $(n=98)$ | None $(n=37)$ | No Response $(n=52)$ | Overall <br> Percent (\%) of Sample |
| No | 30.1\% | 33.0\% | 0.0\% | 38.8\% | 43.2\% | 32.7\% | 33.3\% |
| Yes | 69.4\% | 66.7\% | 100.0\% | 61.2\% | 56.8\% | 65.4\% | 66.2\% |
| No Response | 0.5\% | 0.4\% | 0.0\% | 0.0\% | 0.0\% | 1.9\% | 0.4\% |
| Total | 100.0\% | 100.0\% | 100.0\% | 100.0\% | 100.0\% | 100.0\% | 100.0\% |

2. There is no evidence of political affiliation-based differences in opinions about a city-wide law forbidding smoking in all public buildings, $\chi^{2}(10)=6.18$, n.s.

| Political Affiliation |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| City-Wide Policy? | Democrat $(n=218)$ | Republican / <br> Conservative $(n=285)$ | Libertarian $(n=2)$ | Independent / Either $(n=98)$ | None $(n=37)$ | No <br> Response $(n=52)$ | Overall <br> Percent (\%) of Sample |
| No | 31.9\% | 31.6\% | 0.00\% | 36.7\% | 40.5\% | 32.7\% | 32.9\% |
| Yes | 67.6\% | 68.1\% | 100.0\% | 63.3\% | 59.5\% | 65.4\% | 66.7\% |
| No Response | 0.5\% | 0.4\% | 0.0\% | 0.0\% | 1.9\% | 1.9\% | 0.4\% |
| Total | 100.0\% | 100.0\% | 100.0\% | 100.0\% | 100.0\% | 100.0\% | 100.0\% |

3. There is no evidence of political affiliation-based differences in opinions about a state-wide law forbidding smoking in all public buildings, $\chi^{2}(10)=8.56$, n.s.

| Political Affiliation |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| State-Wide Policy? | Democrat $(n=218)$ | Republican / Conservative $(n=285)$ | Libertarian $(n=2)$ | Independent / Either ( $n=98$ ) | None $(\mathrm{n}=37)$ | No Response $(n=52)$ | Overall <br> Percent (\%) of Sample |
| No | 35.2\% | 36.8\% | 0.00\% | 40.8\% | 43.2\% | 36.5\% | 37.1\% |
| Yes | 64.8\% | 62.8\% | 100.0\% | 59.2\% | 56.8\% | 61.5\% | 62.6\% |
| No Response | 0.0\% | 0.4\% | 0.0\% | 0.0\% | 1.9\% | 1.9\% | 0.4\% |
| Total | 100.0\% | 100.0\% | 100.0\% | 100.0\% | 100.0\% | 100.0\% | 100.0\% |

4. There is no evidence of political affiliation-based differences in opinions about whether new local laws encourages new businesses, $\chi^{2}(15)=18.49$, n.s.

| Political Affiliation |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Effect on New Businesses? | Democrat $(n=218)$ | Republican / Conservative $(n=285)$ | Libertarian $(n=2)$ | Independent / Either $(n=98)$ | None $(n=37)$ | No Response $(n=52)$ | Overall <br> Percent (\%) of Sample |
| It would have no effect on whether businesses decided to come here. | 44.9\% | 43.9\% | 50.0\% | 57.1\% | 62.2\% | 51.9\% | 47.7\% |
| It would discourage businesses from coming here. | 23.1\% | 20.7\% | 0.0\% | 17.3\% | 13.5\% | 11.5\% | 19.9\% |
| It would attract businesses here. | 30.6\% | 34.7\% | 50.0\% | 25.5\% | 24.3\% | 32.7\% | 31.4\% |
